Honestly now, who would arrest a person if they just claimed Antarctic territory and started building a military base as a private entity? Would the UN bother? Is the US sending a squad of Marines to take me out? Is Norway sending a fleet? Like legit would the average government official care? Who? And how? Like for real, unclaimed territory is just sitting there and the only reason its unclaimed is cus the Great Powers were afraid to start an Antarctic arms race during the Cold War.

>but nigger its cold why would you want to ever go there lol

"coal, hydrocarbons, iron ore, platinum, copper, chromium, nickel, gold and other minerals have been found". Plus it's free of any settled degenerates and niggers outside of seasonal egghead scientists in meme research stations. No claims are valid either unless you back it up with settlement and willingness to defend it (unlike the meme French claim over North America during the 17th and 18th centuries)

>"coal, hydrocarbons, iron ore, platinum, copper, chromium, nickel, gold and other minerals have been found"
WOW. that's incredible! you must be some kind of genius for thinking of exploiting all of these minerals. free for the taking! why hasn't anyone thought of this yet????

hmm...I wonder if it's profitable to extract and transport them given the conditions they are found in...

I have thought of this before. If you go to antarctica and you build a civilization with its army, economy, etc. No one would go there to fight. The problem being Antarctica is not only cols but also poor insolated which makes agriculture and heating almost impossible like requiring one square kilometers of solar collectors to raise the temperature at the greenhouse 5 C° from -40

> resources
Okay but I notice you omitted food and water there, all a basic requirement for supplying the things that would turn all those into exportable goods.

Also, do you have the cash to send all the materials to set up the infrastructure and facilities to extract all that? You do not. Nobody here does. You're all middle class or less. Anybody WITH the cash probably doesn't want to do something so risky because the fact that you even have to ask is probably why it hasn't happened.

The only solution would be: 1 Become rich. 2 Go to antarctica as hyper richfags. 3 Settle there and claim it. No one would care.4 Release greenhouse gasses and melt the whole continent and pray for the next glaciation in 1000 years to never come. 5 Have some way to make millions of humans(artificial wombs) to claim the whole continent before someone is tempted to settle after all the ice is gone.

When it comes to supplies, early stage will be finding a cheap way to send a constant stream of supplies from Cape Town until mining can be profitable

Anonymous ID:Q6JOLRxW Thu 17 Dec 2020 13:51:46 No.297227614 Report
Quoted By: >>297228176
The governments of the world don't like anyone trying to start a new country without their permission. A group of lolbertarians dumped a bunch of sand on top of a submerged reef with the plan to make it their own lolbertarian country. They were almost immediately invaded by Tonga while the other countries of the world laughed.
Set up your base in Antarctica. Even do it on unclaimed land. What happens next? They wait for you to die. If you survive the winter, they come take your base from you. It might be the US, it might be Argentina, it might be Mozambique. One thing is for sure, someone will come for you. Crashing the country club isn't allowed.

Anonymous ID:xFF7qdt6 Thu 17 Dec 2020 13:52:26 No.297227689 Report
Quoted By: >>297227981 >>297231372
>>297223606
You can claim but there's no point, no one would recognize your clain, you can't get anything out of your claim (good luck mining things under kilometers of ice) and you probably wouldn't even be able to build a base in the first place since it would cost an assload of money to do.
If you were seriously chimping out (like dumping pollution there or something) then arresting you would be the responsibility of which ever country you are citizen off, otherwise they would probably just ask you to stop.

>>297224380
It's all based on proximity, everyone besides the norwegians has an island or part of their country close to that area. Norwegians claimed theirs just because.

How I envy you lucky snowniggers for being so unmixed due to geographical position even though your language sounds retarded as fuck to me...but I guess it's a small price to pay for racial purity.

Mass genetic modification of humans fucking when?
The Balkans in general could use it so they stop being so dumb, inefficient, violent, corrupt, ugly etc.
But the eternal kike probably won't even let us use it to fix our dumb masses(if we're not extinct by the time it becomes advanced enough) because they obviously prefer to turn us all into serfs.

The book I mention in >>297229635 has some suggestions. I lent the book to a friend years ago and never got it back so I don't remember the actual areas he listed. Think it also mentioned that there are some secret countries already in existence but the book was written in 1979 so they may have died out.

lol, we just kicked out some asylum family from Albania recently.
Despite racial purity we are pretty cucked, the worst part is the capitalist faggotry about always making more profits, because you always shit your on own people for profits.
At least our women still fuck everything under the sun, including white men.

Climate and lack of 4km tall ice sheet. Many people don't know this but the Earth have been on an ice age since 30 million years because Antarctic hasn't melted. Antarctica is literally the largest desert in world, at least deserts have sun for energy which would allow massive desalination.

If you are serious first you need to buy a nuclear ice breaker and some nuclear fuel to set up your first operating base at some natural port.
Permanent settlements anywhere deeper will need logistics for supplies and nuclear fuel.
A few hundred billion dollars would be enough.

It's been a long time since I read it but from what I remember, it said there were several paths. The most common is a model country, which is just you declaring your house as country but not actually trying to exert sovereignty. You can make a flag, issue novelty stamps, passports, currency, etc. being careful that everyone knows they're not accepted by anyone. There are hidden countries, which is where you go off grid and start up your own community somewhere remote that isn't likely to be found. There are gray area countries such as Sealand, which are allowed to exist as long as they don't cause too much trouble.
It was an interesting book but do keep in mind it was written 40 years ago. Might not be as easy to remain hidden as it was back then.

LOL, repent - Natural Law is a meme given you by noetic beings who just want souls after death. Are you that retarded to not see? No doubt at all of what they whisper to you?

Deuteronomy 18:10 There shall not be found among you anyone who makes his son or his daughter pass through the fire, one who uses divination, one who practices witchcraft, or one who interprets omens, or a sorcerer

Micah 5:12 I will cut off sorceries from your hand,
And you will have fortune-tellers no more.

Deuteronomy 18:14 For those nations, which you shall dispossess, listen to those who practice witchcraft and to diviners, but as for you, the Lord your God has not allowed you to do so.
